

What is My Healthy Pet?

My Healthy Pet is a mobile phone application that enables pet owners to be more involved and active in their pet's health and lifestyle.

My Healthy Pet enhances pet owner's experiences with keeping track of classic pet needs.

Problem Solved

There are currently little to no apps available that help owners of all pet types be more involved and proactive in their pet's lifestyle and health.

Pet's Health Features

Classic pet needs supported include:

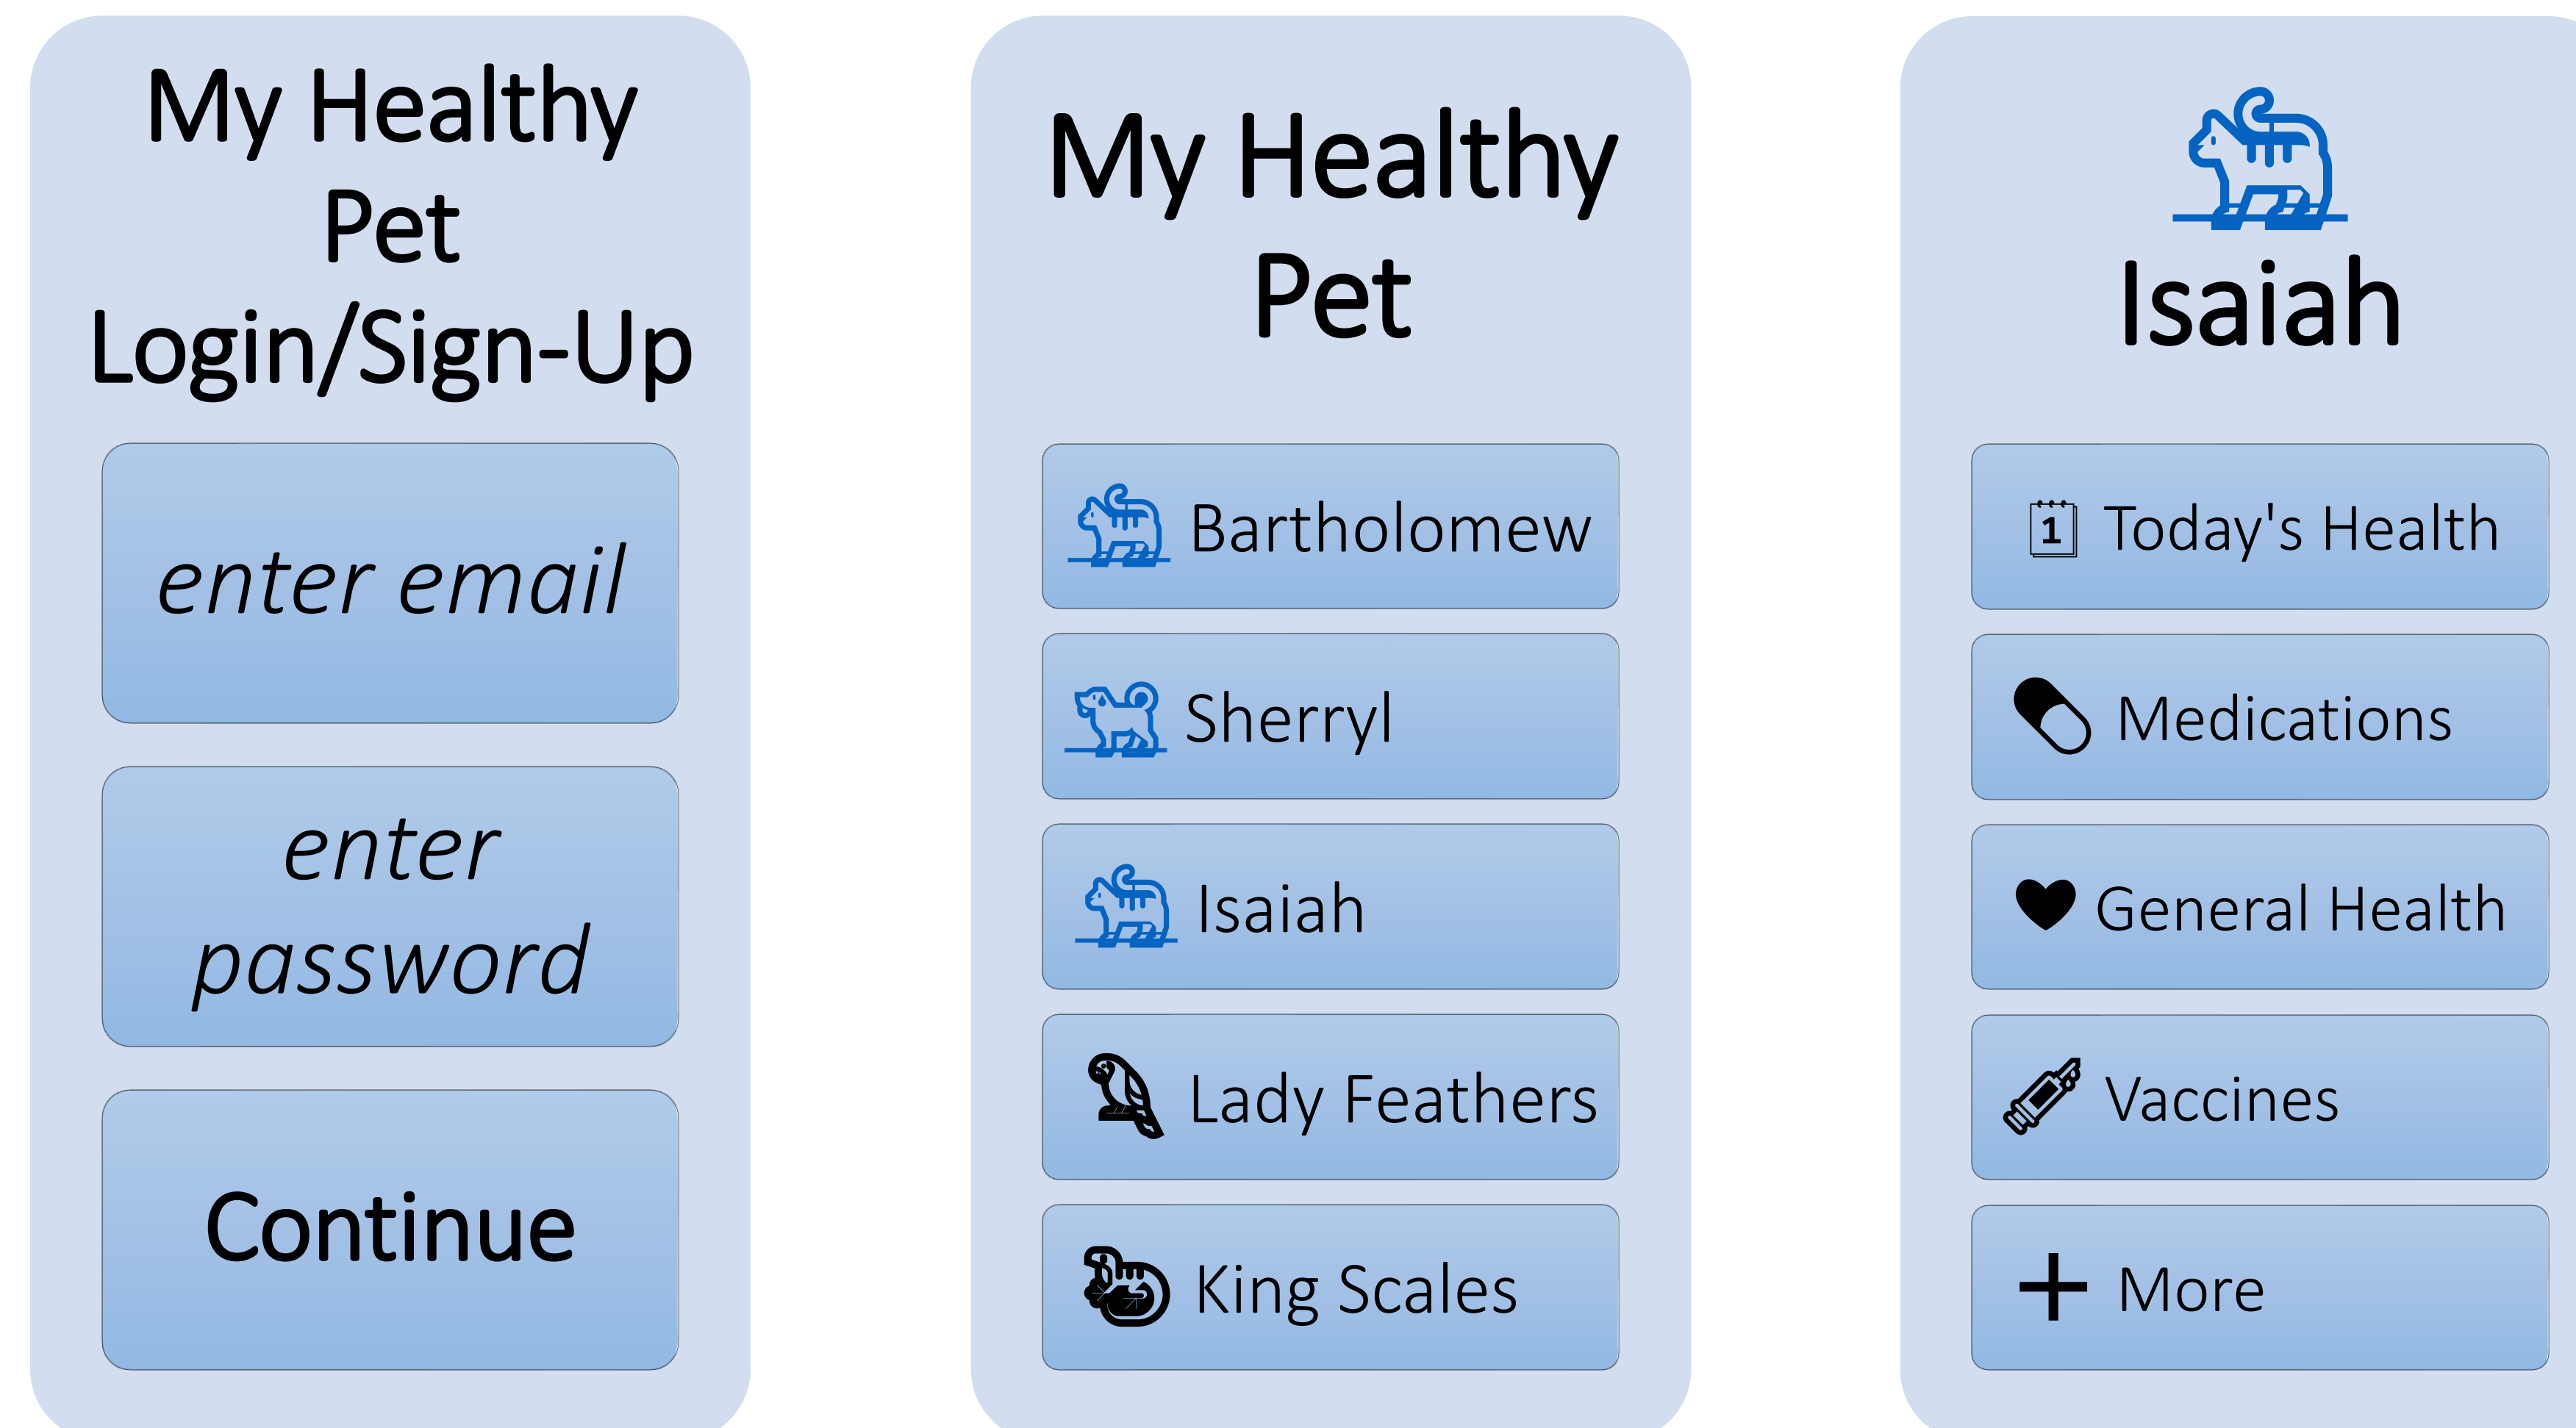

- Eating habits
- Exercise habits
- Medications
- Medical conditions
- Daily symptom tracking
- Daily pet notes
- Vaccination record management

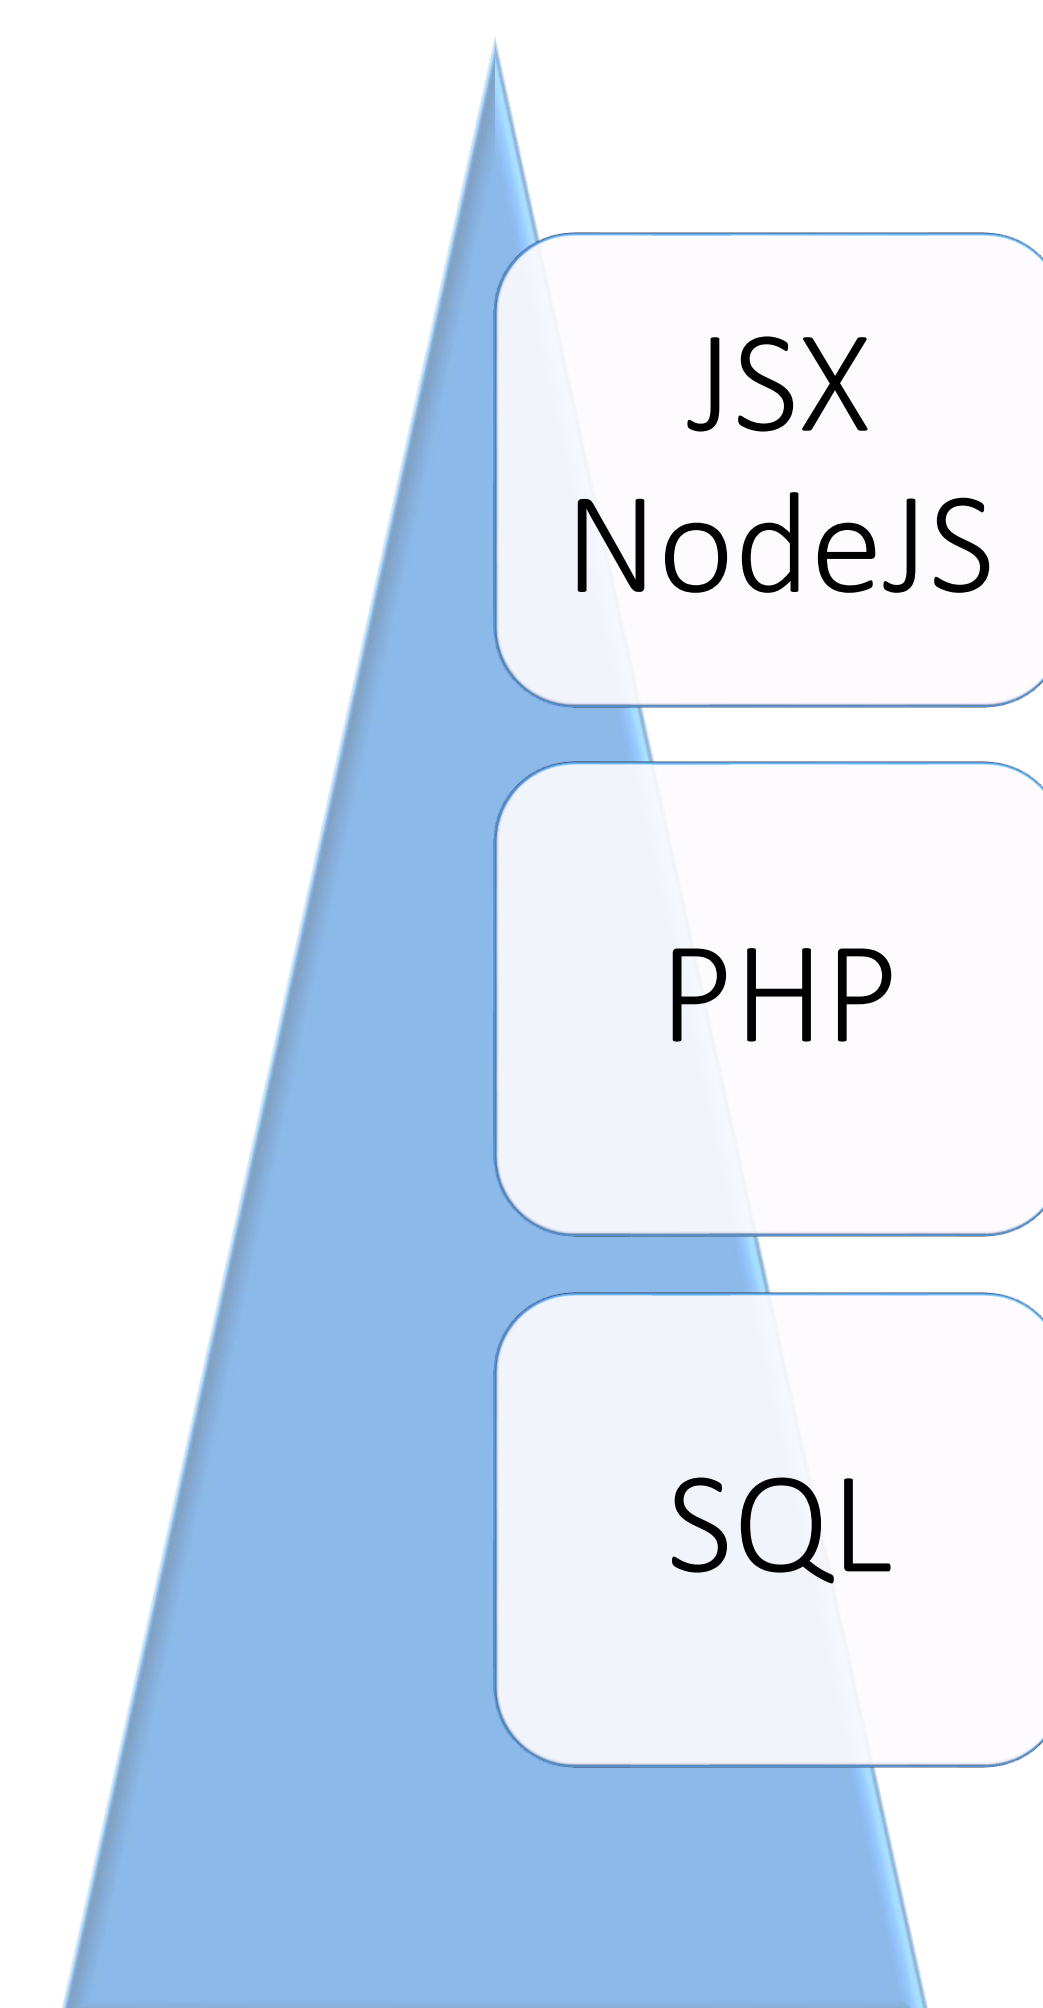

Tools Used

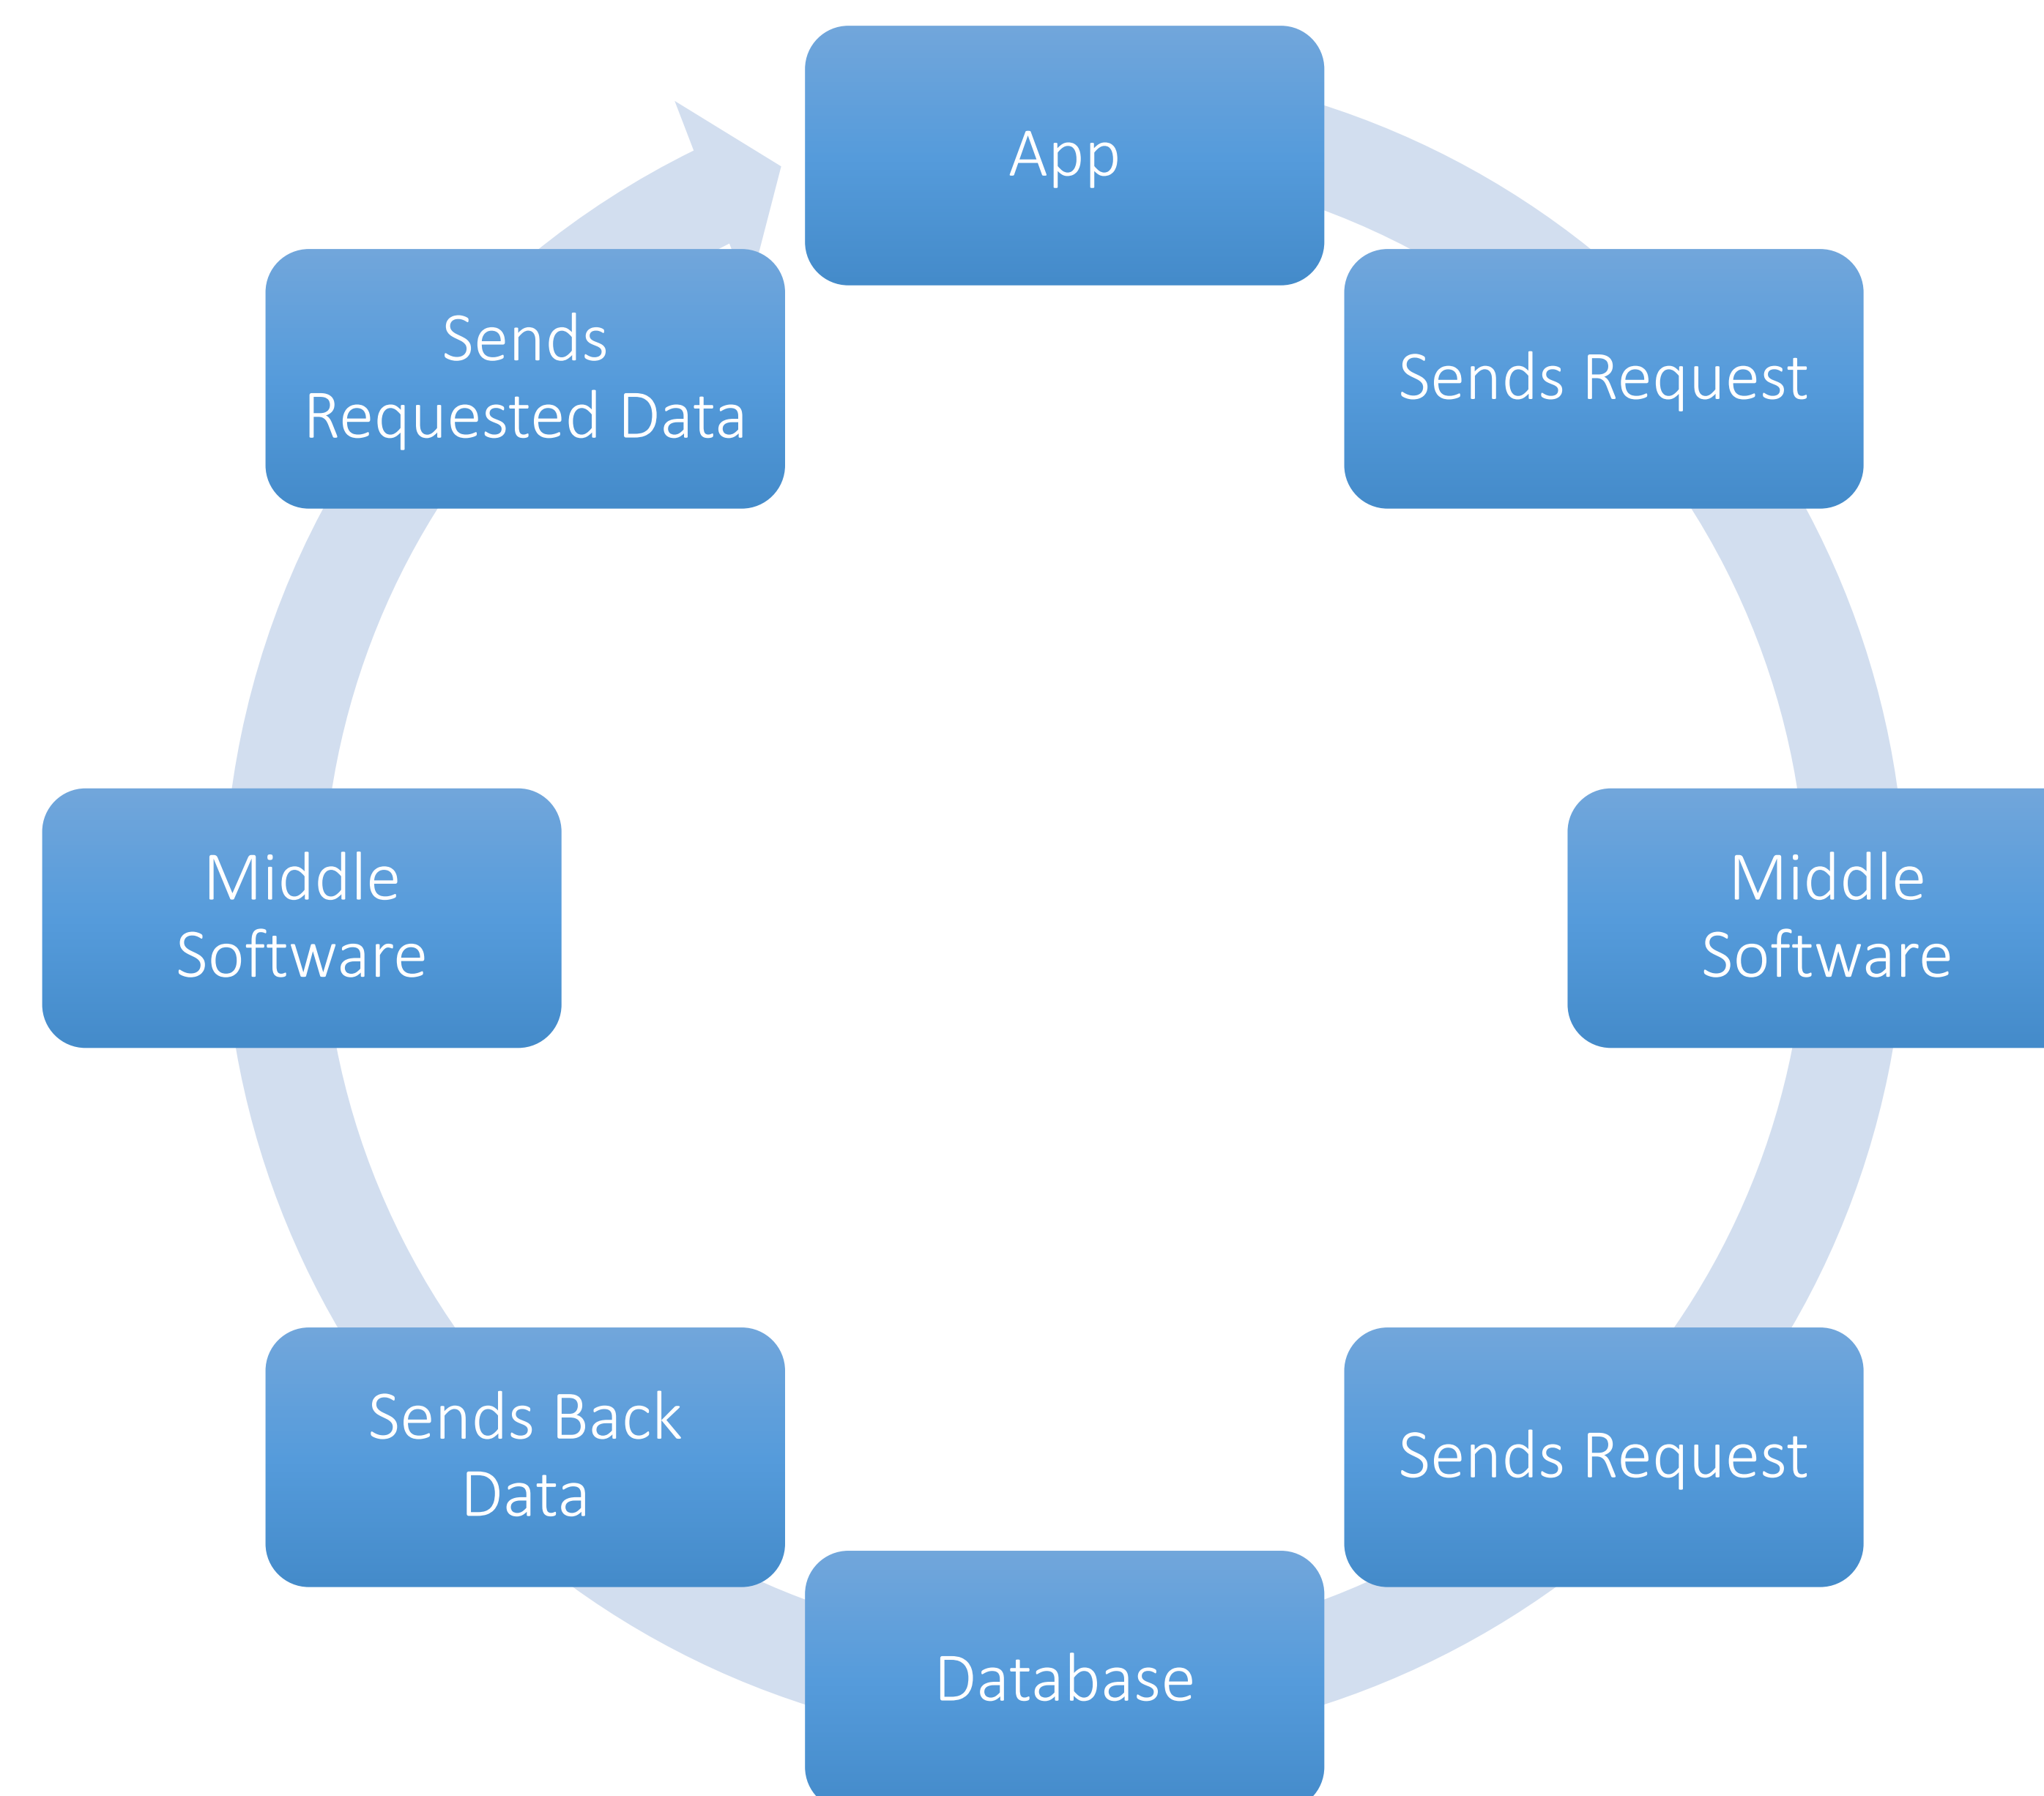

User Home Page and Pet Profile Home Page

App Languages

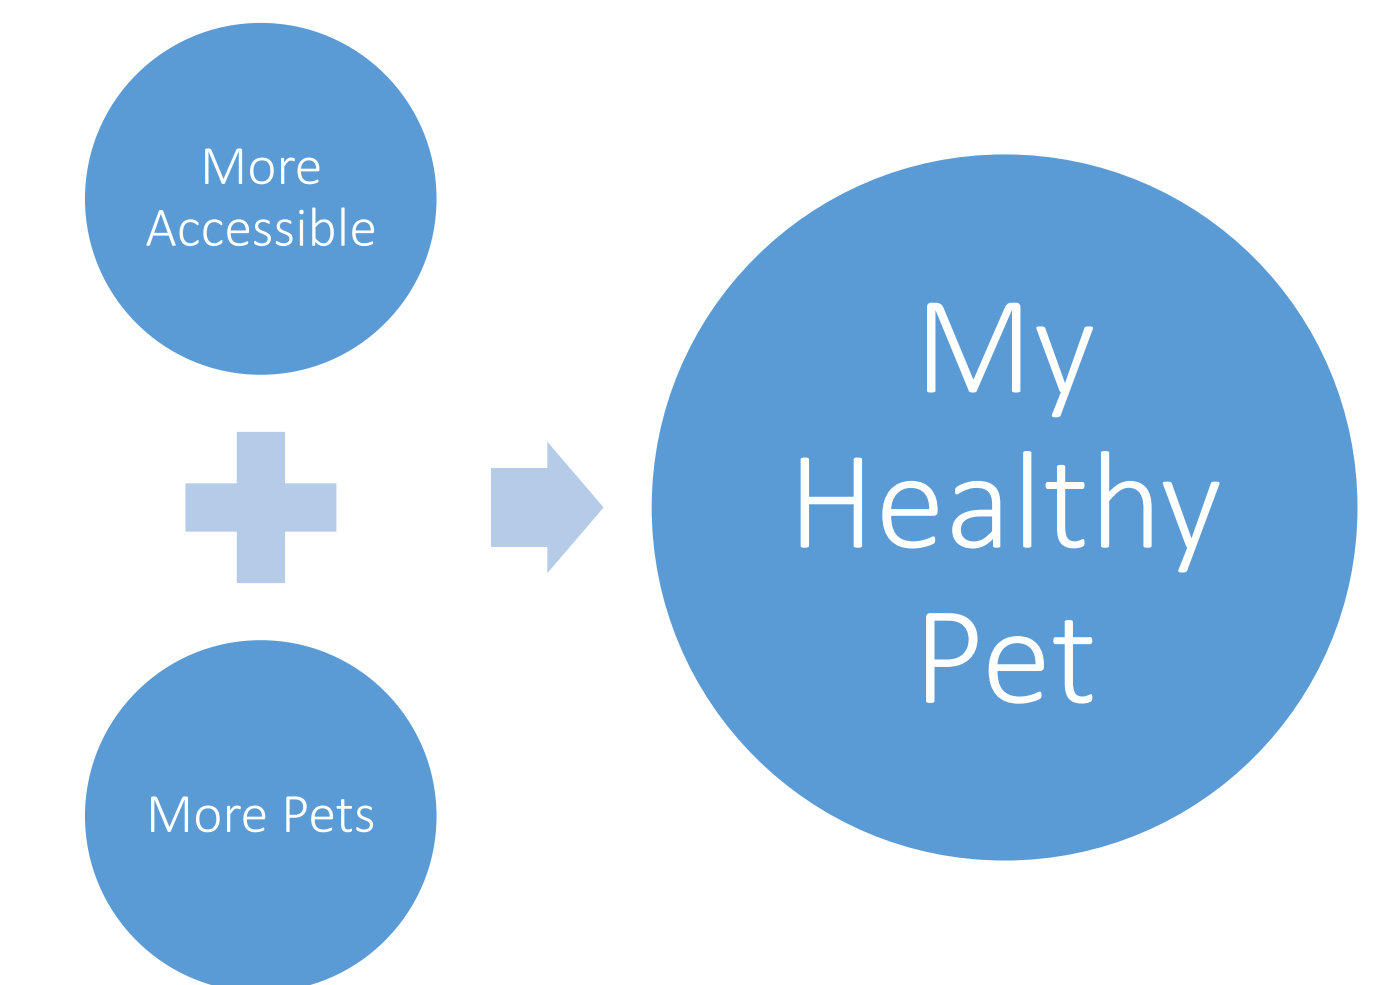

How it Works

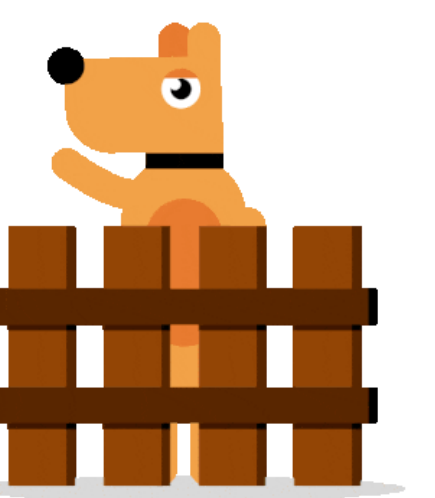

App Features

- Available on Android and iPhone
- Available for a variety of pets, traditional or exotic
- Multiple pet profiles per user

Team Obstacles

- Learning React Native
- Learning PHP
- Time and schedules
- Working remotely

Future Development Plans

- Add a feature that allows users to set alarms and reminders
- Add more vaccines for more species into our database
- Allow users to download pet history as a pdf
- Further improve user interface (UI)

Conclusion

My Healthy Pet strives to make users become more active with their pet's health and will continue to work on improvements to make it as simple as possible.
