

CMPS 2010 Lab 9

Fall 2024

Program 1 - Structs and Dynamic Memory

- Create a separate folder for this lab called lab9
- Inside of the lab9 folder do the following:
 - Use wget to download the monster.cpp file found here:
<https://cs.csub.edu/~paul/cs2010/code/week10/monster.cpp>
 - Create a folder called monsters
 - Complete all three TODO sections found in monster.cpp the the following order:
 - TODO 1 found in genMonster
 - TODO 2 found in makeMonsterCards
 - TODO 3 found in main
 - Be sure to compile your code and run your executable after each TODO

Run this command from your lab9 folder to submit your work.

```
/home/fac/paul/s/submit.sh
```
