CMPS 2010 Lab 10

Spring 2024

Program 1 - Structs and Dynamic Memory

- Create a separate folder for this lab called lab10

- Inside of the lab10 folder do the following:

  - Use wget to download the monster.cpp file found here:

    https://cs.csub.edu/~paul/cs2010/code/week10/monster.cpp

  - Create a folder called monsters

  - Complete all three TODO sections found in monster.cpp the the following order:

    - TODO 1 found in genMonster

    - TODO 2 found in makeMonsterCards

    - TODO 3 found in main

  - Be sure to compile your code and run your executable after each TODO

Run this command from your lab10 folder to submit your work.

```
/home/fac/paul/s/submit.sh
```
