Course Description
An introduction to webpage layout and design with HTML and CSS and client-side web programming with Javascript. Students will design and create a webpage using technologies covered in the course.

Prerequisites
None

Textbook
Online Resources

Material Covered
Week 1: Introduction to Web Development
Week 2: Introduction to HTML Markup
Week 3: Introduction to Cascading Style Sheets
Week 4: CSS Box Model
Week 5: Web Design Layout
Week 6: Image Handling
Week 7: Introduction to JavaScript
Week 8: JavaScript Continued
Week 9: Looping
Week 10: Functions
Week 11: Arrays
Week 12: HTML Forms and Validation
Week 13: Bootstrap and jQuery
Week 14: Advanced WebDev Topics
Week 15: Final Project Presentations

Attendance
It is recommended that you attend every class session and that you are not late to class. Lectures will begin at the class start time. I may randomly take attendance for record keeping but it does not count for points.
**Academic Integrity Policy**
Do your own work. The use of any AI based text-generation tools is expressly forbidden. Violations are determined in accordance with the Department’s policy on academic honesty.

**Open Computer Lab and Tutoring**
The walk-in computer lab in Science III is available for use by students in this course outside of class time on a first come/first serve basis. Priority in the lab is given to students who are completing assignments for Computer Science and Computer Engineering courses.

Tutoring is also provided on a limited basis in the walk-in lab. The tutors are not allowed to solve the assignment for you, but they can assist with problems like compiler errors.

**Grading**

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Labs</td>
<td>25%</td>
</tr>
<tr>
<td>Project 1</td>
<td>25%</td>
</tr>
<tr>
<td>Project 2</td>
<td>25%</td>
</tr>
<tr>
<td>Final Project</td>
<td>25%</td>
</tr>
</tbody>
</table>

All labs, assignments, and projects are given equal weight unless stated otherwise. This is subject to changes based on assessment of the class’s academic progress and needs.

**Homework & Labs**
25% of your grade will be based on labs assignments. Late labs will not be excepted. Extensions will be given for extreme circumstances on an individual basis.

**Homework**
Homework assignments will be assigned on the course website as needed and will mostly consist of reading/watching online materials. Homework assignments are not graded; however, they provide you with additional material to enhance your learning and prepare you for labs and projects.

**Labs - DUE TUESDAY BY MIDNIGHT!**
Lab assignments will be posted on the course website every TUESDAY. Labs will be worth 10 points and usually involve a few small web design projects. Partial credit will be given for incomplete projects.

**Midterm & Finals**
There will be a 2 midterm projects and 1 final project. Late projects will not be accepted.

**Midterm Projects**
Project descriptions and due dates will be announced promptly ahead of time. Projects will consist of fully developed web pages based on lecture material and lab assignments. For each project, you will have 2 weeks to complete the requirements. Each project will have a rubric for criteria and descriptions matching the achievement level. Partial credit will be given for incomplete projects.

**Final Projects**
Your final project will consist of a project proposal, fully developed web pages, and a short 5-minute presentation of your completed project. Unlike the midterm projects, the final project will be entirely up to you. The requirements for the final project proposal and the criteria for the project will be announced at a later time. Presentations will be held during the last week of lecture. Attendance for presentations will be required. If a final project is not submitted, then the student will receive an incomplete for the course. Details on submitting the final project will be posted.

**Assignment & Project Submissions**
All work will be submitted by uploading your files to your public_html directory on Odin. You will place each lab and project in its own folder. This will be explained in more detail in class.

**Statement Regarding Accommodations for Students with Disabilities**
To request academic accommodations due to a disability, please contact the Office of Services for Students with Disabilities (SSD) as soon as possible. They may be reached at 661-654-3360 (voice), or 661-654-6288 (TDD). If you have an accommodations letter from the SSD Office, please present it to me during my office hours as soon as possible so we can discuss the specific accommodations that you might need in this class.
